

Eduardo Rabelo de Moraes

English ⇄ Brazilian Portuguese Translator

LAWYER-LINGUIST

01

POSITIONING

I translate where precision has consequences.
My legal training is what makes that possible.

For twenty-two years, I practiced law independently in Brazil — reading contracts and procedural texts closely enough to know how one word can change what a document does. That habit of reading did not stay behind when I began translating.

My work now moves between English and Brazilian Portuguese across contracts, software interfaces, and literary text. Different registers, one question underneath each: what does this text need to do, in the other language, to remain true to itself?

The chapters that follow show how I answer it — and where I already have.

02

PHILOSOPHY

Legal language does not tolerate approximation. A contract clause translated with the wrong register can shift liability, blur intent, or quietly undo an agreement that took months to negotiate. The cost is not stylistic. It is structural.

Software and game text carry the same risk at a smaller scale. A mistranslated string breaks more than a sentence — it breaks trust in the product itself. A phrase carried across cultures without judgment can say something its author never meant.

Three domains. One discipline. Law teaches precision under scrutiny. Language gives it a second voice. Culture decides whether that voice still means what it meant.

*“Precision is not a preference here.
It is the work.”*

This is the standard behind every project that follows.

03

PRACTICE

Five disciplines, one habit of mind: read carefully, render exactly, verify independently.

01 Legal Translation.

Contracts, corporate documents, and procedural texts, translated with the same attentiveness to consequence that years of legal practice taught me.

02 Localization — Software & Games.

User interfaces, dialogue, and narrative content adapted for Brazilian Portuguese audiences — preserving function and tone within each platform's constraints.

03 Editorial Translation.

Literary and marketing content translated to protect voice, rhythm, and intention — not only meaning.

04 Linguistic Quality Assurance (LQA).

A second, independent pass through translated material, checking terminology, consistency, and fit across projects running to thousands of strings.

05 Machine Translation Post-Editing (MTPE).

Correcting machine-generated output until it reads as though no machine had touched it.

What follows is where this judgment has been tested.

Chosen for one reason: each was reviewed by someone other than me, and accepted.

Legal. A Brazilian civil procedure text governing asset attachment and debtor penalties, translated into English without losing its procedural precision.

Software Localization. Microsoft MakeCode, a STEM education platform built with the Micro:bit Educational Foundation. Localized through Crowdin, reviewed, and shipped to students worldwide. The Foundation later confirmed the contribution in writing.

Game Localization. Foundation and One Piece: Pirate Warriors 3 — dialogue and terminology localized for Brazilian Portuguese players, reviewed by each project's community, and released in the live versions people play today.

Editorial. Há Quanto Tempo (Long Time No See), a 2,000-word short story by Eduardo Lins, translated into English and reviewed with the author for international publication.

Different formats. The same standard.

05

Every engagement follows the same order.

METHOD

Terminology first. Before translating a word, I confirm the glossary, register, and constraints the project requires.

Translation. The text is rendered for meaning, function, and tone together.

Verification. A second, independent pass checks consistency and fit before delivery.

Only the material changes.

“A translation succeeds when the reader forgets it was ever translated at all.”

06

BACKGROUND

EDUCATION

Bachelor of Laws, Universidade Cândido Mendes, Rio de Janeiro (1998–2003).

Postgraduate Degree in Law (Lato Sensu), Damásio Educacional, São Paulo (2006–2007).

PROFESSIONAL QUALIFICATION

Called to the Bar, OAB/SP — registration active.

English proficiency qualification, Kaplan Aspect, San Diego (2008).

TECHNOLOGY

Trados Studio, Crowdin, Smartcat, MateCat, Subtitle Edit, memoQ.

RECOGNITION

Contribution formally recognized by the Micro:bit Educational Foundation (2026).

São Luís, Maranhão, Brazil.

Every text carries consequences.
I look forward to discussing yours.
